Broad, low-profile table

06

46cm Coffee Table

460 W × 460 D × 430 H

Compact side table

Dimensions are shown in millimetres. Final product specification is confirmed with your order.

Premium is in the specifics.

SELECTED NATURAL TEAK

Natural teak forms the structural foundation of the collection, selected for its warmth, stability and suitability for outdoor furniture. Grain, tone and character naturally vary from piece to piece.

MORTISE-AND-TENON JOINERY

Traditional mortise-and-tenon timber joinery is specified throughout the structural frame construction, creating a clean connection between shaped timber components.

OUTDOOR UPHOLSTERY

High-density, yarn-dyed outdoor upholstery with a water-repellent finish. The fabric is selected for outdoor use, easy maintenance and a refined woven appearance.

CUSHIONING

High-resilience rebound foam provides supportive seat cushioning, paired with resilient fibre-filled back cushions for a softer, relaxed profile.

SPECIFICATION NOTE

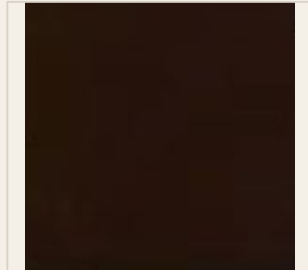

The collection is made to order. Timber finish, upholstery selection and final dimensions are confirmed prior to production. Density, fade-resistance and certification claims are only published once supported by final test documentation.

A considered palette.

Twelve timber finish references are currently available for specification. Finish numbers correspond to the physical sample board supplied for the collection.

Natural material / colour note

Timber is a natural material and each piece will vary in grain and tone. Photography, printing and screens can also shift colour. Final finish selection should be confirmed against a physical sample before production.

Care, warranty & delivery

5 YEAR STRUCTURAL WARRANTY

Designed for long-term use.

SOLEA furniture is covered by a five-year structural warranty from the date of delivery against defects in the structural timber frame and joinery arising from faulty materials or workmanship under normal residential use.

The structural warranty does not cover upholstery, cushions, fabric fading, surface finishes, natural timber weathering or movement, normal wear, accidental damage, misuse, commercial use or damage caused by inadequate care. Your rights under the Australian Consumer Law are not excluded or limited.

CARE

- Keep furniture covered when not in use and avoid prolonged exposure to standing water.
 - Clean teak with a soft damp cloth and mild soapy water. Avoid harsh chemicals, abrasive cleaners and pressure washing.
 - Spot clean upholstery promptly and allow it to dry completely before covering or storing.
 - During extended periods of rain or non-use, keep cushions protected in a dry, ventilated space.
 - Teak will naturally develop variation in tone and character over time; this is part of the material's ageing process.
-

DELIVERY INCLUDED

Made to order. Arranged around your space.

Main upholstered pieces are made to order, with an indicative production and delivery timeframe of approximately 8-12 weeks. Delivery arrangements are coordinated according to your order, location and property access. Supporting pieces are delivered with the associated SOLEA setting.
